HeatWave SuperQuiet®

MAXIMIZE THE ENJOYMENT OF YOUR SWIMMING POOL INVESTMENT

by heating your pool with an AquaCal® heat pump.

Free heat is taken from outside air and transferred to the pool water.

A HEAT PUMP DOESN'T BURN ENERGY TO CREATE HEAT.

It only uses a small amount of energy to transfer **FREE** heat from the air to the pool.

The only heat pump that allows you to maximize the potential savings of a variable speed pump is an AquaCal®. Our patented **ThermoLink®** Titanium Heat Exchanger's unique flow characteristics allow you to run the pump at lower RPMs, ultimately saving you money.

This patented hydraulic design adds only 2 PSI at 45 gpm, increasing compatibility with two-speed & variable speed pumps.

Heat a pool for about **25% of the cost** of heating it with gas

No other heat pump in its class is **quieter**

Heat pumps are **green** and have virtually no effect on your carbon footprint

AquaCal® has been producing quality heat pumps **since 1981**

Setting the standard for excellence in the industry for **over 40 years**

Over **375,000** happy customers worldwide

Smart Microprocessor Control with LCD Display

- Weather protected control with **full text display** provides easy-to-read menu options and unit status
- Ability to **connect to external controllers** for heating and cooling mode
- **Hybrid functionality** can initiate a gas heater when an extra boost of heat is needed

AquaTop

- Unique Air Flow Vectoring Top ensures optimal air flow for **maximum efficiency**
- World's **ONLY** integrated top that **protects internal components** and prevents debris like leaves and other vegetation from getting inside the heat pump, rotting and becoming corrosive
- Protection provided by the AquaTop allows for an extended **10 year warranty** on the evaporator coil

Corrosion Proof Cabinet

- Louvered side panels **protect evaporator coil** while ensuring efficient air flow
- Rust and fade proof cabinet is impact resistant
- Built-in drain pan provides condensate management

ICEBREAKER® Heat & Cool Models

- **Extends swimming season** longer than any other heat pump on the market
- Continues to heat at freezing temperatures to **minimize heat loss**
- Cools your pool to a refreshing temperature

Now PoolSync™ Ready

- Adjust the mode to heat, cool or autotemp (when applicable), and set your temperature through the PoolSync app

*Additional purchase of PoolSync WiFi Controller required
