

1/4" Cobalt Reflective Fire Glass

Product ID: AFG-AFF-COBLRF
Weight: lbs
Manufacturer: American Fire Glass

1/4" Cobalt Reflective Fire Glass

For thousands of years mankind has been drawn to the heat and beauty of fire. The hottest color of fire is blue, and its vivid intensity draws the eye, mesmerizing the viewer. Imagine being able to recreate this intense look in your customers' décor. Our 1/4" cobalt reflective fire glass makes it possible.

Your customers are sure to relish the awestruck look on the faces of their families and friends as they gaze upon the orange and red flames in their fireplace, dancing upon and reflecting off these shiny blue cobalt fire glass pieces. The look of the 1/4" cobalt reflective fire glass is both striking and mod, and is guaranteed to make a bold impression in all gatherings, whether used indoors or outdoors.

A Practical Alternative to Ceramic Logs & Stones

But our cobalt reflective fire glass isn't just beautiful to behold, it is also very practical. It does a wonderful job of covering the entire floor of a fire feature, thereby hiding the unseemly pipes and tubes which are often visible in gas fireplaces and fire pits. This makes fire glass a more desirable alternative to the more commonly seen ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

American Fireglass' reflective fire glass is safe and durable for use in any fire pit or fireplace. This tempered glass is guaranteed to withstand temperatures of up to 1300 degrees Fahrenheit and rough weather without crumbling, or losing its color or shape. No matter how often your customers use their fireplace or fire pit, they will not notice any change in our fire glass.

Finally, fire glass does not give off any harmful chemicals, smoke or soot, so your customers will be

able to spend more time enjoying the fire glass and less time cleaning it!

If your customers want something to really 'WOW' their guests at their next get together, introduce them to our 1/4" cobalt reflective fire glass!
