# PRODUCT NAME: SUPER SHOCKWAVE™ GRANULAR CALCIUM HYPOCHLORITE

EPA Registration Number: 1258-1239-42177

## **1. PRODUCT AND COMPANY IDENTIFICATION**

Arch Chemicals, Inc. 501 Merritt 7 PO Box 5204 Norwalk, CT 06856-5204 REVISION DATE: 05/07/2007 SUPERCEDES:

MSDS Number: 0000000 SYNONYMS: None CHEMICAL FAMILY: Hypochlo DESCRIPTION / USE: Sanitizer FORMULA: NOT API

00000004142 None Hypochlorite Sanitizer and Oxidizer NOT APPLICABLE/MIXTURE

### 2. HAZARDS IDENTIFICATION

 

 OSHA Hazard Classification:
 Oxidizer, Toxic by inhalation., Corrosive, Eye and skin hazard, Lung toxin

 Routes of Entry:
 Inhalation, skin, eyes, ingestion

Chemical Interactions:No known or reported interactions.Medical Conditions Aggravated:Asthma, respiratory and cardiovascular disease

Human Threshold Response Data

Odor ThresholdApproximately 1.4 mg/m3 (based on odor threshold of chlorine)Irritation ThresholdApproximately 13-22 mg/m3 (based on irritation threshold of chlorine)

Hazard Ratings :	<u>Health</u>	Flammability	Physical / Instability	<u>PPI / Special</u> hazard.
HMIS	3	0	1	OX
NFPA	3	0	1	

### Immediate (Acute) Health Effects

Inhalation Toxicity:	HARMFUL IF PRODUCT IS INHALED IN HIGH CONCENTRATIONS.
	CAUSES BURNS TO RESPIRATORY TRACT. Inhalation of dust or vapor from this product can be irritating to the nose, mouth, throat and
	lungs. In confined areas, mechanical agitation can result in high levels
	of dust, and reaction with incompatible materials (as listed in Section 10)
	can result in high concentrations of chlorine vapor, either of which may
	result in burns to the respiratory tract, producing lung edema, shortness
	of breath, wheezing, choking, chest pains, impairment of lung function
	and possible permanent lung damage.
Skin Toxicity:	CAUSES SKIN BURNS. Dermal exposure can cause severe irritation
	and/or burns characterized by redness, swelling, and scab formation.
	Prolonged skin exposure may cause permanent damage.
Eye Toxicity:	CAUSES BURNS TO EYES. Severe irritation and/or burns can occur
	following eye exposure. Direct contact may cause impairment of vision
	and corneal damage.
Ingestion Toxicity:	MAY BE FATAL IF SWALLOWED. CAUSES BURNS TO DIGESTIVE TRACT. Irritation and/or burns can occur to the entire gastrointestinal
	tract, including the stomach and intestines, characterized by nausea,
	vomiting, diarrhea, abdominal pain, bleeding, and/or tissue ulceration or
	perforation. Due to the corrosive nature of this product, ingestion may be
	fatal.
Prolonged (Chronic) Health Effect	ts
- intering our connerner ricatur Enot	

Inhalation:	Repeated inhalation exposure may cause impairment of lung function and permanent lung damage.
Skin Contact:	Effects similar to those from acute exposure. Effects secondary to tissue destruction may also occur upon prolonged or repeated exposure.
Ingestion:	There are no known or reported effects from chronic ingestion except for effects similar to those experienced from single exposure.
Chronic Target Organ Toxicity:	None known
Supplemental Health Hazard	No additional health information available.

# **3. COMPOSITION / INFORMATION ON INGREDIENTS**

CAS OR CHEMICAL NAME	<u>CAS #</u>	<u>% RANGE</u>
CALCIUM HYPOCHLORITE	7778-54-3	60 - 80

Water	7732-18-5	5.5 - 10

# 4. FIRST AID MEASURES

Inhalation:	IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
Skin Contact:	Call a poison control center or doctor for further treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
Eye Contact:	IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
Ingestion:	IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give
Notes to Physician:	anything by mouth to an unconscious person. Probable mucosal damage may contraindicate the use of gastric lavage.

# **5. FIRE FIGHTING MEASURES**

Flammability Summary (OSHA):	This product is chemically reactive with many substances. Any contamination of the product with other substances by spill or otherwise may result in a chemical reaction and fire., This product is a strong oxidizer which is capable of intensifying a fire once started. Product is not known to be flammable, combustible or pyrophoric.	
Flammable Properties		
Flash Point:	Not applicable	
Autoignition Temperature:	Not applicable	
Extinguishing Media:	Water only. Do not use dry extinguishers containing ammonium compounds.	
Fire Fighting Instructions:	Use water to cool containers exposed to fire. See Section 6 for protective equipment for fire fighting.	
Upper Flammable / Explosive Limit, Lower Flammable / Explosive Limit,	% in air: Not applicable	

### 6. ACCIDENTAL RELEASE MEASURES

Personal Protection for Emergency Situations:	Response to a large quantity spill (100 pounds or greater) or when dusting or decomposition gas exposure could occur requires the use of a positive pressure full face supplied air repirator or self contained breathing apparatus (SCBA), chemical resistant gloves, coveralls and boots. In case of fire, this personal protective equipment should be used in addition to normal fire fighter equipment.
Spill Mitigation Procedures	
Air Release:	Vapors may be suppressed by the use of water fog. All water utilized to assist in fume suppression, decontamination or fire suppression may be contaminated and must be contained before disposal and/or treatment.
Water Release:	This product is heavier than water. This material is soluble in water. Monitor all exit water for available chlorine and pH. Advise local authorities of any contaminated water release.
Land Release:	Contact at 1-800-6546-911 immediately. DANGER: All spills of this product should be treated as contaminated. Contaminated product may initiate a chemical reaction that may spontaneously ignite any combustible material present, resulting in a fire of great intensity. In case of a spill, separate all spilled product from packaging, debris and other material. Using a clean broom or shovel, place all spilled product into plastic bags, and place those bags into a clean, dry disposal container, properly marked and labeled. Disposal containers made of plastic or metal are recommended. Do not seal disposal containers tightly. Immediately remove all product in disposal containers to an isolated area outdoors. Place all damaged packaging material in a disposal container of water to assure decontamination (i.e. removal of all product) before disposal. Place all undamaged packaging in a clean, dry container properly marked and labeled. Call for disposal procedures.
Additional Spill Information :	Hazardous concentrations in air may be found in local spill area and immediately downwind. Remove all sources of ignition. Stop source of spill as soon as possible and notify appropriate personnel. Dispose of spill residues per guidelines under Section 13, Disposal Consideration. This material may be neutralized for disposal; you are requested to contact Arch Chemicals at 1-800-654-6911 before beginning any such procedure. FOR ALL TRANSPORTATION ACCIDENTS, CALL CHEMTREC: 1-800-424-9300 REPORTABLE QUANTITY: 10 lbs. (as calcium hypochlorite) per 40 CFR 302.4.

### 7. HANDLING AND STORAGE

Handling:

Avoid inhalation of dust and fumes. Do not take internally. Avoid contact with skin, eyes and clothing. Upon contact with skin or eyes, wash off with water. Remove contaminated clothing and wash before reuse.

	ch emicals, c.	MATERIAL SAFETY DATA SHEET
Storage: Shelf Life Limitations:	cool, dry, well-ventilated area. Sto flammable products. Keep product contamination, including, e.g. othe organic materials, nitrogen-contain extinguishers (containing mono-ar all corrosive liquids, flammable or Shelf life (that is, the period of time stated label strength) is determine temperatures. Do not store product (125 Deg.F). Storage above this te decomposition, evolution of chlorin combustible products.When stored conditions, product will maintain st	et pacakging clean and free of all er pool treatment products, acids, ning compounds, dry powder fire mmonium phosphate), oxidizers, combustible materials, etc. e before the product goes below of by storage time and et at temperatures above 52 Deg.C emperature may result in rapid ne gas and heat sufficient to ignite d under moderate temperature tated label strength for ed storage at 35 Deg.C (95 Deg.F) the shelf life. Incompatible Materials for Storage:	Do not allow product to come in co including e.g. other pool treatment materials, nitrogen-containing com extinguishers (containing mono-ar all corrosive liquids, flammable or	ontact with other materials, t products, acids, organic npounds, dry powder fire nmonium phosphate), oxidizers,
Do Not Store At temperatures Above	: Storage above this temperate	ure may result in rapid chlorine gas and heat sufficient to

# 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Ventilation:	Use local exhaust ventilation to minimize dust and chlorine level where industrial use occurs. Otherwise ensure good general ventilation.			
Protective Equipment for Ro	outine Use of Product			
Respiratory Protection :	Wear a NIOSH approved respirator if dusts are created. NIOSH approved full face piece air-purifying respirator with chlorine cartridges and dust/mist			
Skin Protection :	prefilter. Wear impervious gloves to avoid skin contact. Where industrial use occurs, full impermeable suit may be required.			
Eye Protection:	Use safety glasses w	ith side shields. Whe	ere industrial use occurs, chemical	
Protective Clothing Type:	goggles may be required. pe: Neoprene (This includes: gloves, boots, apron, protective suit)

# **10. STABILITY AND REACTIVITY**

Stability and Reactivity Summary:	Product is not sensitive to mechanical shock or impact. Product is not sensitive to electrical static discharge. Product will not undergo hazardous polymerization. Product is an oxidizer. Not pyrophoric. Not an organic peroxide. Not water reactive. Arch calcium hypochlorite products meet the specifications of ASTM method E-487-74 as set forth in 49 CFR 173.21.
Conditions to Avoid:	May be unstable at temperatures above 170 Deg. C (338 Deg. F), Avoid storage at temperatures above 52° C (125° F)., Prevent

# **11. TOXICOLOGICAL INFORMATION**

Component Animal Toxic	cology
Oral LD50 value: CALCIUM HYPOCHLORITE SODIUM CHLORIDE CALCIUM CHLORIDE CALCIUM HYDROXIDE	LD50 (65% calcium hypochlorite) 850 mg/kg Rat LD50 = 3,000 mg/kg Rat LD50 = 1,000 mg/kg Rat LD50 = 7,340 mg/kg Rat
Dermal LD50 value: CALCIUM HYPOCHLORITE SODIUM CHLORIDE CALCIUM CHLORIDE CALCIUM HYDROXIDE	LD50 (65% calcium hypochlorite) > 2,000 mg/kg Rabbit LD50 > 10,000 mg/kg Rabbit LD50 = 2,630 mg/kg Rat No data
Inhalation LC50 value: CALCIUM HYPOCHLORITE CALCIUM HYPOCHLORITE SODIUM CHLORIDE CALCIUM CHLORIDE CALCIUM HYDROXIDE	Inhalation LC50 1 HOUR (65% calcium hypochlorite), (Nose Only) = 2.04 MG/ Rat Inhalation LC50 4 HOUR (65% calcium hypochlorite), (Nose Only) = 0.51 MG/ Rat Inhalation LC50 1 HOUR > 42 MG/L Rat No data No data
Dermal LD50 value: Inhalation LC50 value:	LD50 850 mg/kg Rat LD50 CAUSES BURNS TO EYES AND SKIN. > 2,000 mg/kg Rabbit LC50 1.00 HOUR Based on the acute inhalation toxicity for chlorine. Approximately 1.3 MG/L Rat There are no known or reported effects from repeated exposure.
Reproductive and Developmental Toxicity:	Calcium hypochlorite has been tested for teratogenicity in laboratory animals. Results of this study have shown that calcium hypochlorite is not a teratogen.
CALCIUM CHLO	RIDE Not known or reported to cause reproductive or developmental toxicity.

ÁRCH.	Arch Chemicals, Inc.	MATERIAL SAFETY DATA SHEET		
Mutagenicity: CALCIUM CHLORID	the Ames assay. It w	hal response. Calcium hypochlorite activity in two in vitro assays. It pability to produce mutations in nucleus assay. In vitro assays mutagenic potential of bactericidal r toxicity. The concentration which ys is significantly greater than the ed on high cellular toxicity in in vitro		
Carcinogenicity: CALCIUM CHLORID	This product is not known or reported to be carcinogenic by any reference source including IARC, OSHA, NTP or EPA. One hundred mice were exposed dermally 3 times a week for 18 months to a solution of calcium hypochlorite. Histopathological examination failed to show an increased incidence of tumors. IARC (International Agency for Research on Cancer) reviewed studies conducted with several hypochlorite salts. IARC has classified hypochlorite salts as having inadequate evidence for carcinogenicity to humans and animals. IARC therefore considers hypochlorite salts to be not classifiable as to their carcinogenicity to humans (Group 3 Substance).

### 13. DISPOSAL CONSIDERATIONS

CARE MUST BE TAKEN TO PREVENT ENVIRONMENTAL CONTAMINATION FROM THE USE OF THE MATERIAL. THE USER OF THE MATERIAL HAS THE RESPONSIBILITY TO DISPOSE OF UNUSED MATERIAL, RESIDUES AND CONTAINERS IN COMPLIANCE WITH ALL RELEVANT LOCAL, STATE AND FEDERAL LAWS AND REGULATIONS REGARDING TREATMENT, STORAGE AND DISPOSAL FOR HAZARDOUS AND NONHAZARDOUS WASTES.

Waste Disposal Summary :	If this product becomes a waste, it meets the criteria of a hazardous waste as defined under 40 CFR 261 and would have the following EPA hazardous waste number: D001.If this product becomes a waste, it will be a hazardous waste which is subject to the Land Disposal restrictions under 40 CFR 268 and must be managed accordingly.
Disposal Methods :	As a hazardous solid waste it should be disposed of in accordance with local, state and federal regulations.

Potential US EPA Waste Codes : D001
