

MiraFlex Membrane C

Two-component, polymer-modified, highly flexible cementitious waterproofing

Product Features

- Superior UV resistance and permanent flexibility.
- Tenacious adhesion to damp or moist substrates
- Water vapor permeable – breathable membrane
- Outstanding elongation and crack-bridging properties
- Ideal for interior and exterior applications
- Extensive range of colors using Miracote Colorpax LIP

Flexible Cementitious Waterproofing with the MiraFlex Membrane C

MiraFlex Membrane C is a superior two-component, polymer-modified, highly flexible, vapor permeable cementitious membrane for the waterproofing and protection of concrete, masonry and many other types of materials and construction elements. Designed for interior and exterior applications, above and below grade on new or existing substrates, **MiraFlex Membrane C** can be used stand alone with an exposed light traffic-bearing finish. It can also be installed as a waterproofing underlayment and covered with a Miracote flooring system, tile or other types of finished flooring.

MiraFlex Membrane C exhibits excellent adhesion to moist/damp substrates, permanent flexibility and crack-bridging properties, and offers the versatility to be used and applied in horizontal, vertical and overhead applications.

MiraFlex Membrane C

Two-component, polymer-modified, highly flexible cementitious waterproofing

Don't replace it – Miracote It!

Applied in two or more coats by trowel, squeegee, roller, brush or spray equipment to a minimal thickness of 1/16" depending on exposure conditions, **MiraFlex Membrane C** provides superior waterproofing protection that will withstand exposure to chlorides, sulfates, UV, abrasion, impact, hydrostatic pressure and freeze thaw cycling. Available in a natural gray and white powder blends, **MiraFlex Membrane C** can be integrally colored with Miracote ColorPax LIP pigment packs in a wide range of color choices.

MiraFlex Membrane C can also be sealed and/or topcoated with a wide range of scientifically superior acrylic, and polymeric sealer and protective coating technologies from Crossfield Products Corp.

Product Applications

- Fountains, pools, spillways, dams and aquatic tanks
- Waterproofing of planter boxes and foundations.
- Plaza decks and pedestrian bridges
- Balconies and breezeways
- Pool decks and promenades
- Mechanical equipment rooms
- Water and wastewater facilities
- Elevator pits and containment structures
