SECTION 4: FIRST AID MEASURES

4.1 Description Of First Aid Measures	
Inhalation	Remove patient from exposure. Have the contaminated individual blow nose. Keep patient at rest and give oxygen if breathing difficult. If symptoms develop, obtain medical attention.
Skin Contact	Remove contaminated clothing immediately and drench affected skin with plenty of water. If irritation (redness, rash, blistering) develops, get medical attention.
Eye Contact	Irrigate with eyewash solution or clean water, holding the eyelids apart, for at least 15 minutes. Obtain medical attention.
Ingestion	Avoid ingestion. Do not induce vomiting. Get immediate medical attention. CALL PHYSICIAN OR POISON CONTROL CENTER FOR MOST CURRENT INFORMATION.
4.2 Most Important Symptoms And Effects, Both Acute And Delayed	<p>Acute: Depending on the duration of contact, over-exposures can mildly to moderately irritate the eyes, skin, mucous membranes, and any other exposed tissue. Severe, prolonged eye contact may result in blindness. If inhaled, irritation of the respiratory system may occur, with coughing and breathing difficulty. Severe ingestion over-exposures may be fatal.</p> <p>Delayed and Chronic Effects: The Oxidizer component is a skin sensitizer; prolonged or repeated contact with this product may result in the development of dermatitis, rashes, and other allergic skin reactions. Refer to Section 11 (Toxicology Information) for additional information on this product's components.</p>

E-Z POOL®

SECTION 5: FIRE-FIGHTING MEASURES

Not Flammable. No declared Flash Point, Explosive Limits, or Auto-Ignition Temperature.	
5.1 Extinguishing Media	
Suitable Extinguishing Media	Extinguisher suitable for ordinary combustible materials. Class A extinguishing agents.
Unsuitable Extinguishing Media	None known.
5.2 Special Hazards Arising From The Substance Or Mixture	May intensify fire; oxidizer. A self contained breathing apparatus and suitable protective clothing should be worn in fire conditions.
5.3 Advice for Fire-fighters	Extinguish preferably with dry chemical, foam or water spray.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal Precautions, Protective Equipment And Emergency Procedures	Avoid dust generation. Ensure full personal protection (including respiratory protection) during removal of spillages. In case of a spill, clear the affected area and protect people. For small releases (e.g., 2 pound release), clean-up spilled solid wearing gloves, goggles, and suitable body protection. The minimum Personal Protective Equipment recommended for response to non-incident releases (e.g., 300 pound release) should be Level C: triple-gloves (rubber gloves, nitrile gloves over latex gloves), chemical resistant suit and boots, hard-hat, and an air-purifying respirator (with high efficiency particulate filter). Sweep-up or vacuum spilled solid. Triple-rinse area with water. Place all spill residue in a suitable container. Dispose of in accordance with applicable U.S. Federal, State, or local procedures, or the appropriate standards of Canada, Australia, and EU Member States.
6.2 Environmental Precautions	Ventilation recommended.
6.3 Methods And Material For Containment And Cleaning Up	Collect mechanically and dispose of according to Section 13. Transfer to a lidded container for disposal or recovery. Avoid dust generation. Ensure adequate ventilation.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions For Safe Handling	Avoid contact with skin and eyes. Wash hands before eating, drinking or smoking. Avoid accumulation of dust. Use only in well-ventilated areas.
7.2 Conditions For Safe Storage, Including Any Incompatibilities	Store in the original container in a cool, dry well ventilated area. Keep containers tightly sealed. Store containers away from wood, cardboard boxes, and other combustible materials. Inspect all incoming containers before storage, to ensure containers are properly labeled and not damaged. Do not seal a container into which wetted product has been placed. The wetted product will generate toxic gases (e.g., sulfur compounds). If this reaction occurs in a sealed container, there will be a build-up of pressure, which can result in an inhalation exposure to a significant level of toxic substances upon opening the container. Additionally, there is the potential for the pressurized container to rupture. Empty containers may contain residual particulates; therefore, empty containers should be handled with care. Never store food, feed, or drinking water in containers which held this product.
Storage Temperature	Ambient.
Storage Life	Not available
