2 Hazard(s) identification
· Classification of the substance or mixture
GHS03 Flame over circle
Ox. Sol. 3 H272 May intensify fire; oxidizer.
GHS08 Health hazard
Resp. Sens. 1H334May cause allergy or asthma symptoms or breathing difficulties if inhaled.Repr. 1BH360May damage fertility or the unborn child.
GHS05 Corrosion
Eye Dam. 1 H318 Causes serious eye damage.
GHS07
Acute Tox. 4 H302 Harmful if swallowed.
Skin Irrit. 2 H315 Causes skin irritation.
Skin Sens. 1 H317 May cause an allergic skin reaction. STOT SE 3 H335 May cause respiratory irritation.
· Additional information:
There are no other hazards not otherwise classified that have been identified. 0 percent of the mixture consists of ingredient(s) of unknown toxicity.

4 First-aid measures

· Description of first aid measures	
· General information:	
Immediately remove any clothing soiled by the product.	
Symptoms of poisoning may even occur after several hours; therefore medical observati	ion for at least 48
hours after the accident.	
Take affected persons out into the fresh air.	
· After inhalation:	
Supply fresh air.	
Seek immediate medical advice.	
If experiencing respiratory symptoms: Call a poison center/doctor.	
· After skin contact:	
Brush off loose particles from skin.	
Immediately rinse with water.	
If skin irritation continues, consult a doctor.	
· After eye contact:	
Protect unharmed eye.	
Remove contact lenses if worn.	
Rinse opened eye for several minutes under running water. Then consult a doctor.	
· After swallowing:	
Rinse out mouth and then drink plenty of water.	
Do not induce vomiting; immediately call for medical help.	
· Information for doctor:	
• Most important symptoms and effects, both acute and delayed	
Asthma attacks	
Breathing difficulty	
Coughing	
Allergic reactions	
Gastric or intestinal disorders when ingested.	
Irritant to skin and mucous membranes.	
Strong irritant with the danger of severe eye injury.	
May cause respiratory irritation.	
[.] Danger	
Danger of impaired breathing.	
Danger of gastric perforation.	
Causes serious eye damage.	
Harmful if swallowed.	
May damage fertility or the unborn child.	
Indication of any immediate medical attention and special treatment needed	
Severe allergic skin reaction, bronchial spasms and anaphylactic shock are possible.	
Medical supervision for at least 48 hours.	
If necessary oxygen respiration treatment.	
Contains dipotassium peroxodisulphate. May produce an allergic reaction.	(Contd. cr. rors 5)

Reviewed on 08/11/2015

Trade name: EZ SPA Total Care

In cases of irritation to the lungs, initial treatment with cortical steroid inhalants.

5 Fire-fighting measures

· Extinguishing media

• Suitable extinguishing agents: Use fire fighting measures that suit the environment.

- For safety reasons unsuitable extinguishing agents: None.
- Special hazards arising from the substance or mixture

During heating or in case of fire poisonous gases are produced.

May intensify fire; oxidizer.

· Advice for firefighters

· Protective equipment:

Wear self-contained respiratory protective device.

Wear fully protective suit.

· Additional information Cool endangered receptacles with water in flooding quantites.

6 Accidental release measures

• **Personal precautions, protective equipment and emergency procedures** Use respiratory protective device against the effects of fumes/dust/aerosol.

Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation.

Isolate area and prevent access.

Take any precaution to avoid mixing with combustibles.

• Environmental precautions: Do not allow to enter sewers/ surface or ground water.

- Methods and material for containment and cleaning up:
- Pick up mechanically.

Dispose contaminated material as waste according to item 13.

Send for recovery or disposal in suitable receptacles.

Reference to other sections

See Section 7 for information on safe handling.

- See Section 8 for information on personal protection equipment.
- See Section 13 for disposal information.

7 Handling and storage

· Handling:

Precautions for safe handling

Prevent formation of dust.

Any deposit of dust which cannot be avoided must be regularly removed.

Use only in well ventilated areas.

Take any precaution to avoid mixing with combustibles.

Information about protection against explosions and fires: Keep respiratory protective device available.

Contact with combustible material may cause fire.

May intensify fire; oxidizer.

· Conditions for safe storage, including any incompatibilities · Storage: · Requirements to be met by storerooms and receptacles: Provide ventilation for receptacles. Protect from humidity and water. Store only in the original receptacle. Unsuitable material for receptacle: aluminium. Information about storage in one common storage facility: Store away from foodstuffs. Store away from flammable substances. Do not store together with alkalis (caustic solutions). Store away from metals. · Further information about storage conditions: Keep containers tightly sealed. This product is hygroscopic. · Specific end use(s) No further relevant information available.

Keep/Store away from clothing/combustible materials.

8 Exposure controls/personal protection

• Additional information about design of technical systems: No further data; see item 7.

(Contd. of page 8) · Solubility in / Miscibility with Water: Soluble. · Partition coefficient (n-octanol/water): Not determined. · Viscosity: **Dynamic:** Not applicable. Kinematic: Not applicable. · Other information No further relevant information available. 10 Stability and reactivity · Reactivity No further relevant information available. · Chemical stability Thermal decomposition / conditions to be avoided: No decomposition if used and stored according to specifications. Possibility of hazardous reactions Reacts with humid air. Reacts with strong alkali. Reacts with strong acids. Reacts with water. Reacts with powdered metals. Reacts with metals forming hydrogen. Reacts with organic materials. Acts as an oxidizing agent on organic materials such as wood, paper and fats. Toxic fumes may be released if heated above the decomposition point. As the product is supplied it is not capable of dust explosion; however enrichment with fine dust causes risk of dust explosion. · Conditions to avoid No further relevant information available. · Incompatible materials: No further relevant information available. · Hazardous decomposition products: Carbon monoxide and carbon dioxide Sulfur oxides (SOx) Chlorine compounds

(Contd. of page 10)

· Additional ecological information:

· General notes:

Rinse off of bigger amounts into drains or the aquatic environment may lead to decreased pH-values. A low pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably increased, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Other adverse effects No further relevant information available.

13 Disposal considerations

Waste treatment methods

· Recommendation:

Small amounts may be diluted with plenty of water and washed away. Dispose of bigger amounts in accordance with Local Authority requirements.

Dilute concentrate with water and neutralize afterwards with suitable alkali material (sodium hydroxide solution, lime). The formed neutral salts are relatively environment-friendly.

The user of this material has the responsibility to dispose of unused material, residues and containers in compliance with all relevant local, state and federal laws and regulations regarding treatment, storage and disposal for hazardous and nonhazardous wastes. Residual materials should be treated as hazardous.

· Uncleaned packagings:

· Recommendation: Disposal must be made according to official regulations.

· Recommended cleansing agent: Water, if necessary with cleansing agents.
