

# SealBack™

UNMATCHED PROTECTION FROM RAIN AND SUN.

Concrete & Masonry

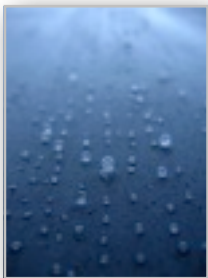

Decorative Wood Trim

SealBack™ is a water-based clear acrylic sealer that provides years of protection when applied to wood, concrete, and plastic surfaces. SealBack™ is uniquely formulated to prevent fading and to self-clean. SealBack™ dries clear, but can be tinted to any color by adding 4 oz. of the desired stain or dye to the one gallon container.

The difference is in the chemistry.

SealBack™ utilizes nano-chemistry - ground-breaking technology that is setting new standards in the performance of paints and coatings.

### Meet The Game Changer.

A nanometer is one billionth of a meter. A container the size of a sugar cube holds enough nano particles to cover an area the size of two football fields. Encore's chosen blend of nano-particles create the most efficient sealer on the market today.

- Deepens and beautifies the surface.
- Self-cleans in the rain.
- Virtually stain-proof.
- Reduces UV greying.
- Reduces mold & mildew growth.
- Extends color life.
- Extends the life of the structure.
- Performs for years.

SealBack™ can be applied to virtually any surface to improve weatherability, performance, and mildew resistance. Here are a few:

- Treated lumber
- Exotic hardwood
- Composite decking
- Pavers
- Concrete
- Cedar siding
- Vinyl siding
- Metal roofing
- Ceramic barrel tile roofing
- Virtually any other surface

#### Recommended Application:

Apply SealBack™ with a hand-pump sprayer and backroll with clean 3/8"-1/2" nap roller. Allow to dry for 8 hours.

Coverage: 700 sq. ft. - 1 coat.  
Coats required: 2  
(substrate dependent)
