BEAUTEC — PRODUCT DATA SHEET

PRODUCT FUNCTION:

The ultimate pool surface protection for superior scale, stain, and scum prevention. Provides unsurpassed surface protection against all stains and mineral scales. The only product that prevents both calcium and hard silica scales and works extremely well in salt generator units.

HOW IT WORKS:

Beautec's advanced Synertec formulation combines a blend of high performance polymers that utilize a complex mechanism of threshold inhibitors, crystal modification and sequestration to accomplish effective preventative and ongoing removal of all mineral scales, deposits, stains, and scum on pool surfaces. Beautec's exceptional performance is due, in part, to its extreme chlorine stability.

FEATURES:

1. The most effective surface maintenance available.
2. Non acidic and 100% phosphate free.
3. Eliminates the need for acid washes, chemical scale remover use, pool down-time.
4. Multi functional protector against mineral scales, deposits, stains, scum and silica.
5. Extremely effective in hardness levels exceeding 1000 ppm and high silica levels up to 300 ppm.

SELLING POINTS:

1. Provides complete inhibition of all types of mineral scales and stains.
2. Excellent for cleaning and maintaining salt chlorinator cells.
3. Small monthly dosage builds protection with each application.
4. No wait. Swim immediately after treatment.
5. Great for new pool start up. Prevents scaling and staining while plaster cures.
6. Protects pool filter, heater, and solar unit against scale formation.

CONSUMER BENEFITS:

1. One bottle will last the average 20,000 gal. pool two months.
2. Works well with salt generator units.
3. Easy to use, just add monthly.
4. Dissolves and removes existing buildup then prevents new deposits.
5. Extremely easy to use. Just pour in.

SPECIAL INSTRUCTIONS:

When used properly throughout the summer, protection continues through the winter..
