

SpeedZone^{EW}

BROADLEAF HERBICIDE FOR TURF

The Industry Leader Made Even Better

WHAT IT IS

Speed and performance made original SpeedZone[®] the #1 speed herbicide...and now it's even better. **SpeedZone[®] EW Broadleaf Herbicide for Turf** features an advanced emulsion-in-water formulation that delivers more complete coverage of the weed surface than original SpeedZone for rapid control of 90+ broadleaf weeds, plus goosegrass and nimblewill, and a lower odor profile and lower Volatile Organic Content (VOC). And the EW formulation is engineered for use in low-volume and conventional sprayers.

WHAT IT DOES

SpeedZone EW Controls

- Goosegrass
- Nimblewill
- Clover
- Plantain
- Ground ivy
- Spurge
- Dandelion
- Other broadleaf weeds as listed
