- 1 pc. - Lower Pipe Assembly (Part B)
- 1 pc. - Middle Pipe Assembly (Part C)
- 1 pc. - Upper Pipe Assembly (Part D)
- 1 pc. - Shower Head (Part E)
- 2 pc. - Set Screws (Part F)
- 1 pc. - Hose Guide Bracket (Part G)
- 1 pc. - Lower Hose Bracket (Part H)
- 1 pc. - Shower Hose (Part I)
- 1 pc. - Upper Shower Head Bracket (Part J)
- 1 pc. - O-Ring (Installed)
- 1 pc. - Quick Connector with Washer

## TOOLS REQUIRED

## IMAGE 2

- 1 Fill the Support Base (Part A) with water or sand. Insert the Base Cap (Part A-1).
- 2 Insert the Lower Pipe Assembly (Part B) into the Base and secure with (1) Set Screw (Part F).
- 3 Attach Shower Hose (Part I) to Shower On/Off Valve (Shower Hose threads come with Teflon tape pre-applied). The adjustable wrench may be needed to tighten shower hose into on-off valve.
- 4 Insert the Middle Pipe Assembly (Part C) into the Lower Pipe Assembly aligning the pre-drilled holes and secure with (1) Set Screw (Part F). A rubber mallet may be needed.
- 5 Attach the Lower Hose Bracket (Part H) onto the Middle Pipe Assembly. Make sure the Large Hook on the Hose Bracket is facing the same direction as the Quick Connector.
- 6 Insert the Upper Pipe Assembly (Part D) into the middle Pipe Assembly.
- 7 Insert the Upper Shower Head Bracket (Part J) onto the Upper Pipe Assembly.
- 8 Connect the hose fastener to the Shower Head, mount Shower Head (Part E) to the Upper Shower Head Bracket of the Upper Pipe Assembly.  
Note: Snap hose into bracket and slide shower handle in place. Adjust angle to your preference.
- 9 Attach Hose Guide Bracket (Part G) half way between the lower Hose Bracket and the Upper Shower Head Bracket. Snap in the Shower Hose to both Hose Guide Brackets. (Parts H and G)
- 10 Remove Quick Connector by sliding sleeve in direction shown to release spring tension. Attach garden hose to the connector and re-attach Quick Connector by sliding over O-Ring. (See Image 2)
