

DETONATION™

Powered by The Sanctuary

Technical Sheet

Detonation® is a liquid microbial probiotic that includes a wide range of beneficial bacteria and fungi. Detonation can be used on any type of soil, turf or ornamental crop.

Detonation delivers outstanding results while reducing the usual amount of nutrients needed to get such results. Detonation works by increasing overall nutrient efficiency and uptake with a variety of high-count probiotics that provide enough fungal units and nutrition to enhance soil colonization.

This product is applied to traditional granular fertilizer, mixed not liquid fertilizer or added to granular calcium products.

SANCTUARY DETONATION

ORGANISM	DETONATION
Azospirillum lipoferum	100,000,000 cfu per ml
Azospirillum amazonense	100,000,000 cfu per ml
Paenibacillus polymyxa	100,000,000 cfu per ml
Trichoderma harzianum	100,000,000 cfu per ml
Bacillus subtilis	100,000,000 cfu per ml
Bacillus licheniformis	100,000,000 cfu per ml
Bacillus amyloliquefaciens	100,000,000 cfu per ml
Bacillus megaterium	100,000,000 cfu per ml
Bacillus pumilus	100,000,000 cfu per ml
TOTAL COUNT	9 x 10⁸ cfu per ml

THE BENEFITS

- Promotes Nutrient Mineralization
- Enhances Soil Microbial Life
- Improves Nutrient Overall Efficiencies
