

NEUTRALIZES SERVEON'S CL500 CLEANER WITH NU100 NEUTRALIZER

PRODUCT DESCRIPTION - NEUTRALIZER

Serveon's **NU100 Neutralizing Rinse** restores the proper pH value and is a safe and easy way to neutralize harmful cleaner and acid residue from common substrates before sealing. Sealers will bond much better to the surface, greatly reducing the likelihood of sealer failure.

USES

Use NU100 on all concrete, brick, tile, stone and masonry after cleaning with CL500 cleaner. It may also be used as an alkaline cleaner for soil removal.

FEATURES

- ✓ Prevents acid/sealer failures
- ✓ Effective neutralizer
- ✓ Environmentally responsible. Phosphate free.

APPLICATION PROCEDURE

AS NEUTRALIZER

1. Flood surface or apply liberally.
2. Allow to stand 1-2 minutes.
3. If necessary, surface may be scrubbed to remove any stubborn stains.
4. Remove with wet vac, mop or sponge.
5. Thoroughly rinse with clean water.
6. Allow surface to thoroughly dry before sealing. Most solvent and water-based sealants require a completely dry surface.

PRODUCT DESCRIPTION - CLEANER

Serveon's **NU100 Neutralizing Rinse** is a very effective general cleaner and particularly for removing and dissolving oily and fatty deposits. It will keep dirt and grease particulate suspended in solution preventing redeposit onto cleaned surfaces.

USES

Use on all concrete, brick, tile, stone and masonry. It can be used as an alkaline cleaner for soil removal and grease and oil stains and deposits.

APPLICATION PROCEDURE

AS CLEANER

1. Ready to use out of the bottle or pail. No mixing.
2. Apply to surface.
3. Scrub to remove stubborn stains.
4. Remove solution, rinse and dry.

OTHER USES

When using an acid, the acid rinse water can be neutralized by adding NU100 Neutralizing Rinse prior to septic or sewer disposal.

CAUTIONS

Contains sodium carbonate and sodium sesquicarbonate. Avoid contact with eyes and prolonged contact with skin. In case of eye contact, flush freely with water. If swallowed, give water and call a physician.
