

### PAVERS

**PAVERS:** A paver is a brick or brick-like piece of concrete commonly used as exterior flooring for patios, driveways, and sidewalks. In a factory, pavers are made by pouring a mixture of concrete, aggregate and a coloring agent into a mold, heated and allowed to set. Pavers have great curb appeal, add to home value, and have many design options. Unfortunately, pavers are prone to efflorescence, a whitish haze that often appears on the surface of pavers within a few weeks or months of installation. Efflorescence is a completely natural but a very unsightly occurrence and can be avoided by applying a Serveon sealant. Sealing pavers enhances and brings out the colors and prevents staining especially on driveways and cooking areas.

---

**Sealant Considerations:** Serveon makes many sealers for protecting Pavers. Some sealers are water-base versions for VOC restrictive states. The right sealer(s) will depend on what is desired to be achieved. Efflorescence can be easily prevented by applying Serveons NS200 sealer that stops efflorescence. Acrylic based sealants that create a wet look can then be applied over it.

---

#### Preventing Efflorescence and General Protection

**NS200-Natural Stone Seal**, water-based, penetrating; repels water, prevents efflorescence, strong beading, leaves natural look. [View Product.](#)

#### General Protection with a Wet Look

**WL250-Wetlook High Gloss**, solvent based, film forming acrylic, high gloss, high performance, high solids, darkens – enhances, wet look, repels water, oil, wine, etc., perfect for pavers. [View Product.](#)

**WL350-Wetlook Low Sheen**, solvent based, acrylic forming film and penetrating sealer; repels water, oils, most stains, enhances, darkens, bring out colors. [View Product.](#)

**RS800-Enhancer, Matte Finish**, water-based, penetrating; repels water, strong beading, enhances colors, wetlook, slight to moderate darkening, prevents efflorescence. [View Product.](#)

#### You May Also Want to Consider

**NS800-Porous Pro Plus**, water-base, penetrating, high performance, strong beading, strengthens substrates, may slightly darken/enhance, prevents salt-water erosion and efflorescence. [View Product.](#)

**CS100-ClearSteel**, solvent based, penetrating; repels water, prevents black algae only (the most common), up to seven-year effectiveness, slight darkening. [View Product](#).

### For Cleaning

**CL500-Cleaner**, water based, concentrate, formulated for cleaning limestone, concrete, grout haze and efflorescence, removes most any stain or discoloration, [View Product](#).

**NU100-Neutralizer**, use after CL500 to neutralize the surface prior to sealing, [View Product](#).

**NS200-Natural Stone Seal**, water based, penetrating; repels water, prevents efflorescence, strong beading, may slightly darken; WL350 and WL250 can be applied over NS200.

**WL350-Wetlook Low Sheen**, solvent based, surface film and penetrating sealer; repels water, oil, wine, most stains, darkens, enhances-brings out colors

**WL250-Wetlook Low Sheen**, solvent based, film forming, high performance, high solids, darkens – enhances, gloss, wet look, repels water, oil, wine, etc., perfect for pavers

**RS800- Enhancer**, water based, penetrating; repels water, strong beading, prevents efflorescence, enhancing wetlook, matte finish - moderate darkening

**You may also want to consider**

**NS800-Porous Pro Plus**, water based, penetrating; repels water, strong beading, strengthens substrates, prevents efflorescence, slight darkening

**CN100-Densifier**, solvent based, penetrating, repels water, consolidates and densifies, resists efflorescence, strong beading, slight darkening

**CS100-ClearSteel**, solvent based, penetrating; repels water, prevents black algae (the most common), up to seven-year effectiveness, slight darkening

**CS200-Algae Stop**, water based, surface film; repels water, prevents most forms/colors of algae, up to 2-3 year effectiveness

**NS900-Stain Pro Max**, water based, penetrating; repels water and oil, many nature stains (leaves etc.) caused by oils, strong beading, slight darkening

**SERVEON SEALANTS PRODUCTS FOR PAVERS**

**SG100-Anti Slip Grip**, textured, polypropylene particles added to film forming sealants (WL350 & WL250) that reduce slippage especially when surfaces are wet.

**For Cleaning**

**CL500-Cleaner**, water based, concentrate, formulated for cleaning limestone, concrete, grout haze and efflorescence, removes most any stain or discoloration

**NU100 Neutralizer**; use after CL500 to neutralize the surface prior to sealing
