Clean Before Sealing for the Best Bond

The best seal starts with a clean surface, and each hardscape surface has distinctly different qualities. Whether it's removing dirt from natural stone or cast residue from wetcast, we've designed these cleaners to give you the best cleaning power for each surface type.

Removing all surface stains is essential to getting the best-looking seal, but even if there is no evident staining on the surface, it's still important to use an SRW general purpose wash. Doing so will prepare the surface for optimal bond with the sealer. Choose PW Paver Wash for pavers, WW Wetcast Wash for wetcast and SW Premium Stone Wash for natural stone.
