DRIFT

SPLASH & SESSION Series

Drift has a 17" seat height and is designed to keep people "drifting" through a space. The seat angle has an aggressive forward lean and this intentionally puts the user in an upright seating position and they have to keep their legs slightly engaged while seated. Drift is a fine seat for a short break or quick gathering, but users will want to find a more comfortable spot if they intend to sit for a long time. Made with rotationally molded hard polyethylene material for supreme impact strength. Waterproof and weather resistant. Bring on the sun, sand, snow, salt, and rain...Drift can take it. Approximately 16 lbs.

- Easy to clean and sanitize.
- Ultra-low VOC emissions to promote healthy indoor air quality.
- Fire test compliant with CAL117-2013 and has zero added flame retardant chemicals.
- Supports up to 300 lbs.
- Rounded edges and corners for safety.
- Top surface sheds liquids and dries fast.
- 100% recyclable.

SPLASH PRODUCT INFO

This version is designed to be placed in the shallow water of a swimming pool. The maximum water depth should not exceed 7". This version has holes added under the seat and under the bottom that allow water to enter and exit the core of the product. Set it in the pool and it rests in place. Pull it from the pool and it quickly releases the water from the core of the product so it can be used on the pool deck.
